

KNITSHIELD | Knitted Mesh KW Shielding

KW Shielding knitted mesh bandage is a tubular form knitted stocking supplied in flat tape form. They are available in four basic wire types – Monel, Aluminium, TCS (Tinned Copper-clad Steel) and Stainless Steel.

Applications:

Knitted mesh tapes are generally used to wrap cable forms, wiring systems or conduit to provide a high integrity 4-layer screen, which, if adequately grounded, can greatly reduce radiated interference.

The tape is a nominal 0.4mm thick and should be spirally overlapped by 50% to provide full screening effectiveness. Each end should be soldered or clamped, avoiding twisting into a 'pigtail' which could effectively become an antenna.

Specifications:

Monel	- BS3075 – NA13	(0.11mm diameter)
Aluminium 5056	- AMS 4182	(0.13mm diameter)
TCS	- ASTM B520	(0.11mm diameter)
Stainless Steel	- Alloy 304	(0.11mm diameter)

Performance: Typical Attenuation dB
